## **DETAILED ACTION**

### ***Response to Amendment***

This action is in response to Applicant's amendment filed May 6, 2008. Claims 17-28, 33-36 and 40-45 are pending in the present application

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification does not mention the claimed "recordable media."

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 28, 36 and 43-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to what Applicant is intended by "recordable media." Applicant is highly suggested to amend the claim to read "computer storage media" to overcome the rejection.

***.Allowable Subject Matter***

Claims 17-27, 33-35 and 40-42 are allowed.

The prior art of records does not teach "receiving multiple electronic documents at a server that have been saved in the absence of an explicit command by a user to save the electronic documents and in response to another user specified function associated with the electronic documents; selecting one or more of the multiples saved electronic documents for publication over a network; ... and the server allowing access to a selected subset of electronic documents by using the authorization information and the document resource identifier" in combination with all elements in the claim.
